A Pinnacle Of Elegance And Serenity

This beautiful home radiates wealth and style, starting with the way it looks from the street. You walk up the bright, floating concrete stairs and are met by a beautiful glass front door that opens to show an amazing entrance hall. The hall has floor-to-ceiling glass walls that let in beautiful views of the lush grass and a stately 100-year-old olive tree.

To the right of the front door is a stylish, open-plan kitchen with built-in tools and a large scullery. There is a formal dining room next to the kitchen, which leads into a cozy TV area. After going down a few steps, you'll reach a large, covered patio with stack doors that lead to a garden and a sparkling pool. This house faces the river and is tucked away on a lush meadow. It gives off a peaceful vibe.

There is also a formal lounge and a study on the main floor, each with its own. The main floor ends with a stylish guest bedroom that has its own bathroom and stack doors that lead to the garden.

You can get to the three large bedrooms upstairs by climbing the beautiful floating staircase made of glass, wood, and steel. There is a full bathroom connected to each of the two secondary bedrooms. The main suite is a real paradise, with views of the greenbelt and river, a large closet, a full bathroom, and a large porch for watching the sun rise and set.

The beautiful house was built with a classic style in mind, and it was all built around a 100-year-old African olive tree. It gives the property an air of prestige and grace that raises the bar for luxury to a whole new level. The architectural masterpiece shows how much people love and appreciate nature because it fits in so well with the beauty of the scenery around it. This beautiful home is a real gem that offers a luxurious and comfortable way of life.

There are also three garages, two of which lead directly into the house, Belgian oak flooring, imported Italian tiles, home automation and audiovisual systems, double glazing on all windows and doors, an evaporation cooling system, underfloor heating, a borehole, a double staff room with a kitchen and dining area, a separate outside toilet, and other high-end features.

Extra power.
