70 Grayston Drive is a state-of-the-art building in the busy business district of Sandton. It has perfect finishes and is watched 24 hours a day, seven days a week. There are backup generators in the building, and there are also access to more storage rooms.

In addition to being in a great spot for signage, this building is also easily located right across the street from the Benmore Shopping Centre. That office space on the first floor is ready to be used right away. It has brand-new rugs and walls that have just been painted. The open-plan design gives you a lot of room to make changes, so you can create an office that works for you.

Because there are so many windows, the office is naturally lit up with lots of natural light, making it a bright and welcoming place. A private porch with stunning views is available in the office, making it the perfect place to relax during breaks.

Get in touch with me to arrange your viewing.
