This beautiful house has everything you could want, and the balcony on the second floor has a great view. You enter a large hall through a door with two levels. Between the living room and dining room is a gas fireplace, and both rooms have air conditioning. The whole downstairs area is tiled and has blinds, so there's no need for shades. The TV lounge opens up to a patio with a built-in braai, a sparkling pool, and a small yard that is easy to take care of and has a sprinkler system. It has a gourmet kitchen with room for a fridge with two doors. The range and oven are gas, so there won't be any problems with line loss. There are a lot of cabinets and room for three under-counter tools in the scullery. There is air conditioning in every room. There is carpeting in all four bedrooms, and there are lots of cabinets. Two of the bedrooms share a full bathroom, but the master bedroom and the guest bedroom each have their own bathroom. This unit has solar energy and a place for people to live. All the way across the grid.
