Enter the hall with the double-volume door. This house is beautiful, modern, and stylish. The kitchen is open to the living room, dining room, and study. It's a gourmet kitchen. The lounge has a fireplace and air conditioning. It leads to a lovely patio with braai facilities and stacking doors that lead to a small yard that is easy to take care of. The kitchen has a center island with a gas stove and an electric oven. The island goes into the laundry room, which has room for three under-the-counter appliances. There are four bedrooms on the second floor. Each one has a queen-size bed and a lot of closet area with glass doors. It's cool in the main bedroom, which has room for a king-size bed and a full bathroom right next to it. Another bathroom is upstairs, and a guest bathroom is downstairs. The garage is two stories and has built-in cabinets all over, so there is a lot of room for storage. The geysers are run by the sun. At this price, this house is a steal.
