This one-of-a-kind home on Hollander Crescent will leave you impressed at every step. Set above the road, with direct access from a double lock-up garage. The house has two levels, including a mezzanine floor that overlooks the reception areas.

The ground floor features a large lounge/dining room with tiled floors that opens out onto a wraparound deck that leads to a pool/entertainment area at one end and an additional outside eating area and built-in braai conveniently near to the kitchen at the other.

A double-volume entrance hall leads to the modern kitchen, which features stainless steel worktops, a large walk-in pantry, and a scullery. There is a casual lounge off the kitchen.

This floor has two bedrooms that share a modern complete family bathroom. A noteworthy staircase leads to the mezzanine floor. At one end is a large bedroom with an en-suite bathroom and a separate dressing area. A gangway connects to the opposite mezzanine floor, which includes a study area (perfect for working from home) and the main bedroom with en-suite bathroom.

This is a home that must be seen to be appreciated. The house is fully secured and move-in ready.
