Presenting Byu Hills - a new project of luxury apartments in the prestigious area of Benahavís. Consisting of only 24 apartments spread over three buildings, the project has been kept to a low number of properties to ensure maximum privacy and tranquillity. The location is superb, chosen especially for the splendid panoramic views over the Mediterranean Sea and down to Gibraltar. All the apartments are luxurious and modern and built to the highest standards. Each property has three bedrooms and a spacious terrace of around 60m², while the ground floor properties benefit from larger outdoor spaces. The penthouses also have their own private pool. Each property also has two parking spaces and a storage room located in the basement. The kitchens are designed by Bulthaupt and the appliances are from the well-known brands Miele and Siemens. The bathrooms are equipped with fixtures from Villeroy and Boch. Each property also has a home automation system for the control of heating, lighting, air-conditioning and hot water. Underfloor heating is also installed throughout the property. Your safety and security is also protected by an alarm system connected directly to a security company and for further safety there are smoke detectors in the main rooms. In the communal areas of Byu Hills you will find an oasis of greenery with a large swimming pool which also affords you fantastic views across Marbella.
